

ORP LIP BALM changed the way the lip balms are used.

ORP LIP BALM became the first lip balm to be granted a "S-Verification" by NPO Japan ORP Measurement Verification Association on July 21, 2016. "S-Verification" is a verification that is given to a product that decreases the oxidation of the body (rusting) and shows a strong reduction action (body's wellness) that aligns our body's condition. This verification was done using human saliva ORP measuring device that is approved by the Ministry of Health and Welfare of Japan.

The oxidation of the body means poor physical condition and the body is getting rusted.

ORP LIP BALM

The reduction of the body means physical wellness and the rusting of the body is being removed.

● ORP LIP BALM Ingredients ●

- Agrochemical-free soybean unicellular powder (non GMO)
 - Calendula oil, Honeybee wax
- Naturally extracted collagen, Natural enzymes, Glucose, Deep ocean water
 - Scent-free, No coloring, No coal tar dye

● Use it before you go to sleep...

While you're sleeping, your body can be anti-oxidized, so you can sleep better and wake up refreshed and be ready for the new day.

● Skin care after washing your face...

Use it after removing the makeup to refresh and to reduce oxidation of your body.

● A makeup base...

Use it as a makeup base to bring out the lively color of your face.

● During bathing...

Put it on your lips while you take your time bathing in lukewarm water to recover from fatigue from the inside and outside of your body

● During sports activities...

Use it to protect from chapped lips caused by sweat and outside air. It will also suppress the increase of the active oxygen (oxidation).

● From infants to elderlies...

Use it to give natural moisture to your lips that will make you look energetic.

● First aid...

Use it for scratches and cuts, when you can't go to the doctor right away as first aid. Wash the scratches and cuts with water before you apply ORP Lip Balm.

● When you have a cold...

Use it to the rough and swollen areas around your nose caused by wiping your nose repeatedly with tissue papers and etc.

● After shaving your face...

Use it for skincare after shaving and after trimming unwanted hair, and also as first aid for razor burn and shaving nicks and cuts.

● When you wake up...

Use a light coat over droops and dark circles around your eyes when you wake up in the morning as an alternative to eye cream.

● For your skin care...

Use it to help give moisture to small areas on the skin that are rough and dry.

● Use it to avoid blisters from wearing tight shoes...

● Use it to make the zipper smoother...

● Use it for nail care...

● Use it for pet's nail care

Some precautions when using ORP LIP BALM

ORP LIP BALM is manufactured with natural ingredients, scent-free and with no artificial and chemical ingredients, and for that reason it is on the softer side. It is our recommendation that you would not extend the tip of the balm too long to avoid any breakage or making it difficult to retract it to the container.

Our lip balm is slightly yellowish and this is because of the natural ingredient, calendula oil that we use. We do not use any artificial or chemical additives. This product is scent free and there are no coloring used. However, if you experience any irregularities on your lips or on other parts of the body that you applied the product, stop using it immediately. When you are in doubt, we recommend that you would try a patch test first.

For storing this product, we recommend that you would keep it in a dark location, low temperature storage of around 15°C, even after opening the product. Once you start using the product, we recommend that you would use it up in a timely manner. Keep this product out of direct sunlight and environment with high temperature and high humidity and keep it out of infants or children reach.
